MINUTEMAN CROPS

To plant where spring seeded crops have failed or
on fields not prepared in time for Spring planting
THESE CROPS can be PLANTED as LATE as JULY 15th

BUCKWHEAT

Will mature grain in 60 to 70 days. Is adapted to wide range of soils. Plant 3 to 5 pecks per acre. Drilled or broadcast.

MILLET

Produces large yields of hay. Plant Common, German or Hungarian varieties. Drill or broadcast one-half bushel per acre.

SORGHUM

Plant early Amber variety. For silage, drill in rows 36 to 42 in. apart. Plant at rate of 6 lbs. per acre. Cultivate and put in silo like corn. For hay, drill or broadcast 1 bushel per acre.

SUDAN GRASS

For seed, plant six lbs. per acre in June and cultivate. For hay, drill or broadcast 20 to 30 lbs. per acre.

RAPE

For hog, sheep and cattle pasturage, plant Dwarf Essex variety. Drill 2 lbs. per acre in rows 22 to 28 in. apart and cultivate, or broadcast 4 lbs. per acre.

FLAT TURNIPS

Drill or broadcast 4 lbs. per acre, or secure larger yields by drilling 2 or 3 lbs. of seed in rows 20 to 30 in. apart; thin and cultivate.

EVERY AVAILABLE ACRE MUST PRODUCE A CROP
BUMPER CROPS mean VICTORY and PROSPERITY
